

Experience life like
you've never seen
it before.

Improving your vision means more than just enhancing your eyesight. It's about refining your quality of life, and focusing on what's really important. Your health. Your happiness. And your freedom to experience life with clarity you've never seen before.

Cataract Surgery and ReSTOR Intraocular Lens implant surgery are just two of the many highly advanced procedures available at Prado Vision, and performed only by Dr. Antonio Prado.

Cataract Surgery

Free yourself from the veil of obscurity.

Cataract Surgery performed by Dr. Antonio Prado gives you the crystal clear vision you seek, and the comfort and peace-of-mind you deserve. Utilizing a highly advanced technique that is less invasive and self-healing, Dr. Prado can truly bring your life into focus, and often completely alleviate your dependence on glasses.

ReSTOR IOL

Unparalleled clarity from near, far and anywhere in between.

The AcrySof® ReSTOR® Intraocular Lens (IOL) is uniquely designed to improve your vision at most distances. Dr. Antonio Prado is proficient at ensuring that your cataract surgery, featuring ReSTOR IOL insertion, will be safe, effective and painless. Combining the revolutionary refraction characteristics of the ReSTOR lens, and the exceptional experience and care of Dr. Prado, your Cataract Surgery and outcome will be unsurpassed.

apodized diffractive IOL

See it all™

The vision you're seeking is revealed.

Phacoemulsification is a state-of-the-art Cataract Surgery technique Dr. Prado uses to gently break apart each cataract into microscopic particles, then remove them through a tiny incision. Through this incision, a new intraocular lens implant (IOL) is inserted to permanently replace your eye's natural lens.

what to expect:

- No pain or discomfort
- Local anesthesia
- Small incision, probe insertion
- Cataract removal
- IOL insertion
- No patch, no sutures
- Natural healing begins
- Monitored recovery
- Most can expect crystal clear vision within hours following the procedure

AcrySof ReSTOR IOL. At a glance, but worth a full-on stare.

The appropriately named ReSTOR lens provides you maximum independence from reading glasses and bi-focals by restoring:

- Refraction: The redirection of light rays as they pass through the lens to focus on the retina and enhance distance vision
- Freedom: Enhanced ability to focus on objects at distance and near without the use of glasses

Discover the elegant confidence.

For a Cataract evaluation, call 813.653.2020 today.
